(TILTED POSITION)**

## *Appreciate the Art of Engineering*

CPS provides solutions to transfer production equipment which are integral components for your powder handling needs. Tilt stations are the device used with side door IBCs that are excellent for difficult flowing products and high-rate transfer. They are designed for contained products to transfer out of bins to tablet presses, encapsulators, and reactor/liquid vessels. We evaluate every application to address the unique requirements of each piece whether it be equipment we provided or existing equipment in your facility.

Custom Powder Systems (CPS) provides situation specific systems for Dry Material Handling/Process Equipment that's fully-integrated for your process. We customize solutions for a multitude of industries, including Food, Chemical, Pharmaceutical, and Nutraceutical.
